Professional Summary

Senior Architectural Project Manager with 25+ years of experience leading complex commercial, residential, mixed-use, and specialty facility projects. Extensive background functioning as an owner's representative, managing external A/E teams, ensuring compliance with California Building Code, Americans with Disabilities Act, life safety, and all applicable standards. Skilled in multidisciplinary coordination, design management, construction administration, code analysis, QA/QC, and delivering fully integrated, technically sound project solutions. Strong communicator with proven ability to manage multiple concurrent projects, lead design reviews, and resolve issues with a focus on constructability, maintainability, and stakeholder satisfaction.

Experience

Senior Project Manager | Impact Housing

March 2023 - Present

- Manage multiple multi-family and mixed-use projects from concept through construction as lead design manager and owner's representative
- Oversee external consultants: define scopes of work, coordinate deliverables, and ensure alignment with design standards, codes, and project objectives
- Conduct QA/QC reviews of drawings and specifications for coordination, constructability, and long-term maintainability
- Lead multidisciplinary coordination with development, manufacturing, and construction teams
- Perform zoning analysis, site evaluation, and conceptual design for new development opportunities
- Manage construction administration: RFIs, submittals, shop drawings, site visits, field issue resolution, and project closeout punchlists
- Mentor junior project managers; provide guidance on code interpretation, detailing, accessibility, and technical issues
- Coordinate responses to plan check comments with staff and permitting agencies
- Develop product improvements based on user feedback, stakeholder input, and cross-team collaboration

Senior Project Manager | SLSD Architecture

June 2019 - March 2023

- Led commercial and residential projects from initial programming through construction completion
- Served as primary point of contact for clients, reviewers, contractors, and design team members
- Generated conceptual design, design development, and complete construction documents
- Oversaw consultant coordination (civil, mechanical, electrical, plumbing, structural, landscape, preservation, specifications)
- Conducted construction administration tasks: site observation, submittal review, RFI responses, punch lists, and closeout
- Coordinated with building officials: responded to plan check comments and permitting requirements
- Developed design budgets and secured fee proposals for all disciplines
- Provided in-office support for accessibility, life safety, constructability, and technical detailing

Senior Project Manager | DW Taylor Associates

August 2003- June 2019

- Managed architectural projects including design development, construction documents, and construction administration
- Directed and integrated all design disciplines ensuring compliance with applicable codes and project requirements
- Created drawings, specifications, life safety plans, and custom architectural details
- Coordinated with clients, contractors, consultants, and regulatory agencies
- Provided technical guidance and oversight to junior staff
